

## Press Release

### Safe Travel Campaign Raising MRO Industry Optimism

**Tangerang, September 4, 2020** - PT Garuda Maintenance Facility Aero Asia Tbk. (GMF) is being optimistic about an increase in the second half of this semester after noticing the positive progress of the growing air traffic gradually. It is aligned with the stakeholders of the Indonesian tourism industry promoted-campaign, where recently tourism has steadily begun to show positive growth, especially during the long holiday moment of Indonesian Independence Day until the Islamic New Year public holiday.

Chief Executive Officer (CEO) GMF I Wayan Susena stated, GMF has served approximately 1.200 domestic and limited international flights. "Even though the number couldn't offset the normal flight condition yet, we perceive this number positively particularly on getting the customers' trust ready to fly again," said Wayan.

The Safe-travel campaign is deemed successful in arousing the public trusts to dare to fly during this pandemic. GMF ensures flight readiness by carrying out the procedures of disinfecting aircraft routinely, maintaining and replacing HEPA filters regularly according to the instructions from the aircraft manufacturing company.

"We constantly ensure to carry out the applicable procedures on handling each aircraft as an effort to increase our customers' trust to dare to fly again, of course, by adapting to new habits," said Wayan.

Meanwhile, in the midst of optimism for the revival of the current aviation industry, GMF has successfully completed the work of C-Check, C01 owned by Nepal Air. During this pandemic, GMF also received job requests for aircraft maintenance from South Korea, Spain, Netherlands, India, Iceland, Vietnam, and Fiji Island. "The demand is increasing until the end of this year, we really hope it can be a positive for the company performance to close the year well, of course with the new target adjustments that we have been adjusted in the midst of this COVID-19 pandemic," said Wayan
