GMF Optimizes Aircraft Maintenance for Garuda Indonesia and Citilink Ahead of 2025 Eid al-Fitr Peak Season

Jakarta, March 21st, 2025 - PT Garuda Maintenance Facility Aero Asia Tbk (GMF) is optimizing aircraft maintenance for Garuda Indonesia and Citilink in preparation for the peak travel season of Eid al-Fitr 2025/1446H. With the peak period of homecoming and return travel expected from March 21 to April 13, 2025, GMF ensures that all Garuda Indonesia and Citilink aircraft remain in prime condition to support smooth flight operations.

As part of its preparations, GMF has conducted a comprehensive evaluation of various operational aspects, including manpower readiness, the availability of tools and supporting materials, and aircraft maintenance facilities at key locations. Special attention is given to stations experiencing increased flight frequencies, particularly multi-base areas such as Kualanamu (KNO), Surabaya (SUB), Denpasar (DPS), and Makassar (UPG), as well as popular tourist destinations expected to see a surge in passenger traffic.

GMF CEO, Andi Fahrurrozi, reaffirmed the company's commitment to supporting the seamless operations of Garuda Indonesia and Citilink. "GMF strives to ensure that all aircraft are in prime condition and airworthy. We are implementing thorough preparations and swift, precise coordination to anticipate any irregularities that could lead to flight delays," Andi stated.

In addition to routine maintenance, GMF also enhances cross-functional coordination to speed up responses to potential operational disruptions. Through this strategy, GMF aims to minimize the risk of delays and ensure a smooth homecoming and return travel experience during Eid al-Fitr 2025.

"GMF's commitment to maintaining the safety and operational reliability of the Garuda Indonesia Group's aircraft remains our top priority. With full readiness and well-planned strategies, GMF is prepared to support seamless mobility for the public during this year's Eid al-Fitr celebrations," Andi concluded.

About GMF

PT Garuda Maintenance Facility Aero Asia Tbk (GMF) is a company engaged in the provision of industrial services, as well as the repair, maintenance, and overhaul of aircraft. As the largest aircraft MRO (Maintenance, Repair, and Overhaul) company in Indonesia with over 70 years of experience, GMF initially started as a division of PT Garuda Indonesia (Persero) Tbk, located at Soekarno Hatta International Airport. GMF has served more than 190 customers across more than 60 countries. In carrying out its business activities, GMF has been recognized by aviation authorities around the world with certifications from more than 25 countries, including the FAA (United States), EASA (Europe), and DGCA (Indonesia). In 2017, GMF officially became a publicly traded company by offering its shares to the public under the ticker code GMFI. Currently, GMF is expanding its operations to enter the power services and defense industries segments. As a result, GMF is expected to realize its vision of becoming the most valuable MRO company through its mission of providing integrated and reliable maintenance solutions as a contribution to the nation and the state.
